RE: California's Proposition 65

Dotson Iron Castings is committed to providing exceptional value to our customers through meeting and exceeding customer requirements, continuously improving, meeting measurable quality objectives and adhering to regulatory requirements, including California's Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986.

Castings in final form, not machined or further processed, are considered articles and therefore do not pose a physical hazard or health risk to employees. However, as with all iron castings, they may contain trace amounts of chemicals listed on the California Proposition 65 list that are known to cause cancer, birth defects or other reproductive health issues. With the exception of nickel (see below), these substances\* are not intentionally added to our castings.

For more information, please refer to our Safety Data Sheet <https://www.dotson.com/dotson-quality/sds/>.

A handwritten signature in black ink that reads "Nancy E. Patterson".
